The AIDS prevention game

Quiz and Panel Game for young adults from the age of 12 years and older

What is Think Negative!®?

Think Negative!® is the only board game which deals with the dangers of HIV / AIDS, sexually transmitted diseases, contraception and puberty.

The questions are drawn from the areas of politics, medicine as well as lifestyle and follow on logically from each other. There are three groups: "Sexuality and Contraception," "HIV / AIDS" and "Destiny".

What matters exactly are raised?

- The cards "Sexuality and Contraception" include questions such as methods of contraception, the false use of contraception, "the first time," pregnancy, puberty, love, male and female circumcision, homosexuality and heterosexuality.
- The cards "HIV/AIDS" include questions regarding subjects such as HIV, AIDS, HIV Test, sexually transmitted diseases, infection and protection.
- The "Destiny" cards do not require knowledge of information but ask for the opinion of the player. Thus, the game is structured with greater variety and sensitive subjects such as peer pressure or social engagement can be discussed within the framework of a discussion

How the game is played:

Think Negative!® is designed for two or more players. With over four players, teams of equal strength should be constructed. The aim of the game is to be the first to reach the square "end" in the best possible state of health. Just as in real life, the players are faced with particular questions, must make decisions and have to deal with blow of fate.

The game includes:

1 Rules
1 board | 4 figures | 1 die | 1 sand glass
60 cards "Sexuality and Contraception"
60 cards "HIV/AIDS"
60 cards "Destiny"

Think Negative!® hopes to make the players aware of the different facets of themes such as HIV/AIDS or infectious disease, without generating fear of sexuality.

Think Negative!® hopes to show that HIV/AIDS is not only a problem for particular groups or the developing countries, but concerns everybody.
